In 2016, Aggies...

Nationally, Texas A&M is Top 9 in Providing Law School Students!

College Diversity
Aggies who enter law school come from every college at Texas A&M, including agriculture, architecture, education, engineering, geosciences, liberal arts, business, science and veterinary medicine.

Lifelong Advising, Lifetime Connections
Accurate, personal advising is available to all Aggies regardless of when they graduated. Current students participate in learning and networking activities though the PreLaw Society and with Aggie law students and lawyers. Students craft their personal paths to law school with skilled and knowledgeable advisors, exploring academic, experiential, and growth opportunities. Aggie clubs at law schools continue to meld the connections with others on the road to becoming an Aggie Lawyer and, ultimately, a member of the Texas Aggie Bar Association.

Admission Rates
- 88% Recent Aggie Grads
- 75% National Applicants
