As of 4/2/2020:

As professional schools are attempting to make decisions on any possible changes in their policies regarding grading of courses (pre-requisite or otherwise) and acceptance of on-line courses, any decisions by a specific school should be on their individual website. We urge you to check school websites for any possible updated information. Please also ensure that you have subscribed to our listserv of your profession (tx.ag/psalistservs). Any updated information the OPSA receives will be forwarded to the appropriate listserv.

We strongly suggest that you keep as many courses at the grade level as possible to be the most competitive (which is usually one of your main concerns) especially the pre-requisite courses you may be taking right now. We highly advise for your long term benefit that you keep all courses permissible in the GPA format.
